# Project Descriptions

## Project 1

### Restaurant & Lounge Areas

As part of this project, the restaurant's interior concept was redesigned from scratch with a blend of luxury and modern lines. Custom-made semi-circular seating systems, metal-detailed marble legs, and green leather finishes were planned to offer both elegance and comfort.

Pendant lighting was used to enhance the ambiance, while dark tones and wood transitions on the walls created a sophisticated atmosphere. All furnishings were designed and manufactured 100% locally by BT Metal Mobilya with special measurements.

This project is one of our brand's signature references, reflecting our unique production power, design craftsmanship, and top-segment material quality.

## Project 2

### Office & Meeting Area & Villa & Luxury Residential Spaces

In this bespoke project, a meeting space was created for top-level executive use, combining high functionality with premium aesthetic standards. An elegant atmosphere was achieved through marble-detailed flooring, velvet-upholstered chairs, and pendant chandeliers.

Dark-colored wall panels and golden accents provided a refined ambiance, adding a sense of modern elegance and luxury to the space.

All furnishings were custom-manufactured by BT GRUP based on specific measurements. The production and installation process was managed with utmost precision. This area stands as a qualified example of our brand's sensitivity in corporate projects and the power of our design capabilities.

## Project 3

### Custom Luxury Table and Chair Set

In this project, the table and chair set produced with BT GRUP's luxurious design approach brings together elegance and quality. The table legs are crafted from 304-grade stainless steel, offering both long-lasting durability and a premium glossy finish.

The tabletop features imported natural marble from Italy, lending a sophisticated appearance to the space. Each piece showcases unique vein patterns, creating an artistic touch. The chair designs incorporate handcrafted gold leaf details and green velvet upholstery, fusing classic aesthetics with modern comfort.

## Project4

### Coffee Tables & Nesting Tables & Dressers

At BT GRUP, we design and meticulously produce complementary furniture from scratch in our own workshops to add aesthetics, functionality, and luxury to living spaces.

This project features a triple coffee table set crafted with a glossy gold-plated surface over a body of 304-grade stainless steel. The use of black glass for the tabletop creates a sophisticated contrast.

Each piece is shaped by our master artisans and carefully refined through welding, grinding, and polishing processes. These products are not only functional, but also serve as strong design elements within interior spaces.

Nesting tables, dressers, and similar complementary items are personalized and crafted to support the overall style integrity in your residential projects—making them essential parts of your collection.

# About Us

Since 2011, we have been combining architectural aesthetics with engineering acumen to offer custom-made furniture and interior solutions inspired by metal, marble and modern lines. We add value to hotels, restaurants, offices and luxury living spaces by prioritizing originality, quality and functionality in each of our projects.

We carry our brand to the future with an international vision with the projects we realize in Turkey and abroad.

As BT GROUP, we offer not only products but also design and a sense of trust.
